

Tekno 2060 Wide Roller Conveyor

Key Benefits & Features:

- 2 ¼" wide roller provides greater contact surface and weight distribution.
- A variety of product can be conveyed directly on the chain such as wooden shipping skids, plastic shipping pallets, slip sheets, corrugated boxes, or welded steel baskets and racks.
- The screw shedding design reduces jams and increases conveyor longevity.
- Chain Action: The unique chain roller action conveys pallets at over 2.5 times the chain speed.

One Wall Street

Tekno 2060 Wide Roller Conveyor

Key Benefits & Features Cont. :

- Option 1: Traction Strip adds to maximum load capacity as well as increasing driving force.
- With the traction strip, product can be driven up to a 6 degree incline.
- Traction strip can be inserted in strategic locations to “pull” gaps between products without additional automation.
- Non tensioned drive system on non-reversing conveyors.
