## Leading The Industry With Modular Solutions

### TEKNO NEWS

#### Dunnage Sortation Project

Tekno is currently working with a customer to provide a solution for the automated sortation of returnable dunnage. Currently, the customer spends millions of dollars manually sorting dunnage and replacing lost dunnage. Tekno is developing a modular system which will automatically sort and count pallets, slip sheets and top frames. The different components will be inspected and re-stacked to be presented back to the processing lines. We will supply more information on this system as it unfolds.

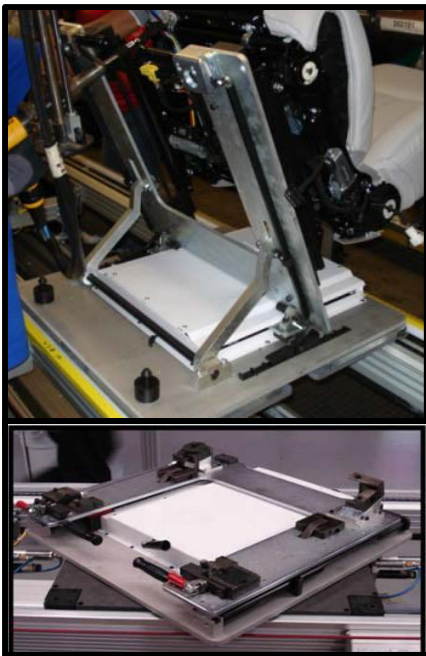

This is just another example of how Tekno is truly.... Leading the Industry With Modular Solutions.

### FEATURED PRODUCT

#### Tekno Pallets

Whether you are installing a new assembly line, replacing existing pallets or re-tooling an existing assembly line, Tekno can provide your pallets and tooling. Tekno can provide pallets which supply power to the product. Rotating or tilting the product is also our specialty. Auto clamping and unclamping are also available. Our engineers have vast experience regarding applications and designs. Send your application information to [sales@tekno.com](mailto:sales@tekno.com) today for a quote or call to discuss your application.

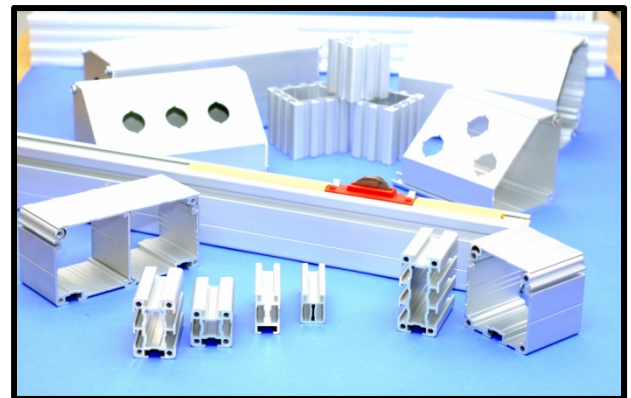

### MODU-TEK FOCUS OF THE MONTH

#### Electrical Components Brochure

You may be familiar with Tekno's Modu-Tek™ line of components. However, we have many recently released items which target controls needs. We have put together a brochure highlighting

E-mail us at [components@tekno.com](mailto:components@tekno.com) to request a copy or to discuss how Tekno can assist with your controls project.
