LEADING THE INDUSTRY WITH MODULAR SOLUTIONS

## TEKNO NEWS

### Tekno's Maintenance Audit and Preventative Maintenance Program

Tekno is once again implementing our Maintenance Audit and Preventative Maintenance Audit Program. Let one of our technicians come evaluate your equipment to minimize down time, improve cycle time, extend equipment life and reduce injury. For a nominal fee, Tekno will perform equipment audits on your Tekno equipment. During the audit, Tekno personnel will check for system wear, recommend a PM schedule, verify spare parts stocking levels and make recommendations. You will receive a thorough report outlining any corrective actions which need to be taken. Tekno will also provide pricing to provide those needed services and components. By providing a maintenance person to follow our technician, your maintenance personnel can receive free training regarding PM's and adjustments. Call today to schedule a maintenance audit for your equipment.

## FEATURED PRODUCT

### Tekno's 2060 Flow Through Beam Conveyor

This month's featured product is a variation of one our core products – the 2060 flow through beam conveyor. This product utilizes the same screw-shedding rooftop design and roll-formed steel wear strip design as our standard 2060 conveyor beam and can accept our standard 2060 non-synchronous chain, 2060 synchronous chain or 2060 wide roller chain. This product can be utilized in more harsh environments allowing debris to pass through and not be contained within the beam. Send your application information to [sales@tekno.com](mailto:sales@tekno.com) today.

## MODU-TEK PROJECT OF THE MONTH

### Last Chance Induct Cart

This month's project was supplied to a tier I automotive seat manufacturing facility. As a part of their requirement to sequence product to meet the Auto manufacturing plant's requirement, they needed the ability to introduce a seat set at a later point – Tekno delivered. This cart will be utilized to introduce a seat set onto the conveyor. Whether this seat set is one that needed repair or a special, last minute requirement, the set can be wheeled into position and loaded. The cart includes a gravity roller bed and docks into position for loading - just another innovative use of Tekno product. Send your application photos to [components@tekno.com](mailto:components@tekno.com) for a chance to be featured in future articles. Modu-Tek – Think it, Build It!
