LEADING THE INDUSTRY WITH MODULAR SOLUTIONS

TEKNO NEWS

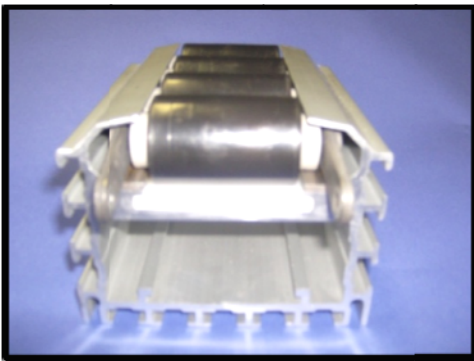

Tekno's 20th Year

This month marks Tekno's 20th anniversary. We have come a long way from our meager beginnings as a design engineering firm to a global conveyor supplier in our current 176,000 sq ft facility in Cave City, KY.

To all of our existing and future customers, we would like to take this opportunity to thank you for your business. We look forward to serving you for many years to come.

FEATURED PRODUCT

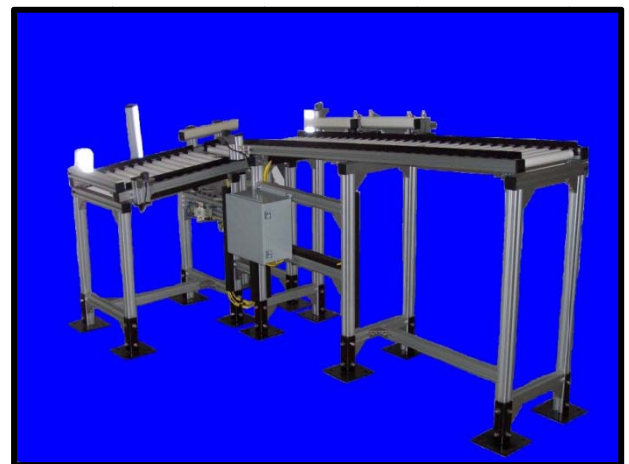

Tekno's 2060 Wide Roller Conveyor

This month's featured product is a variation of one of our core products – the 2060 wide roller non-synchronous conveyor. Tekno is now offering a wider roller version of our 2060 chain. With a 2 ¼" wide large roller, and maintaining the unique chain roller action which conveys products and pallets at over 2.5 times the base chain speed while providing quiet transportation and low back pressure accumulation, we also now achieve greater weight distribution. This product utilizes the same screw-shedding rooftop design and roll-formed steel wear strip design as our standard 2060 conveyor. Applications include wooden shipping skids, plastic shipping pallets, slip sheets, corrugated boxes or welded steel baskets and racks. An optional traction strip provides positive driving force for heavier loads and slight inclines. The wide roller chain is also available in a flow through beam configuration. Send your application information to sales@tekno.com today.

MODU-TEK PROJECT OF THE MONTH

Modular Gravity Roller Conveyor

This month's winner comes from a tier I automotive manufacturing facility. As a part of their presentation of components to an automated cell, this customer will utilize our modular gravity roller conveyor. By combining our modular gravity flow rack materials with our standard automation components, 23 lb plastic totes containing steel stampings will be automatically fed into an automated assembly cell. Send your application photos to components@tekno.com for a chance to be featured in future articles. Modu-Tek – Think it, Build It!
