

Walkover, Mezzanine & Stair Tread

Key Benefits & Features:

Modularity: Easily can be configured to meet any and all safety standards for any application; assembles using only simple hand tools, with absolutely *NO drilling or tapping required!*

Structural Integrity: Beam, support structure, and your choice of vented or solid tread plate are all made of heavy duty clear-anodized aluminum extrusion.

Description: Walkover, Mezzanine, & Stair Tread are used to allow safe pedestrian traverse of conveyors, or to create virtually slip-proof operator platforms. The handrails utilize our T-Slot cover for added safety. These structures will never rust, corrode, or require painting, thus providing a lifetime of reliability.

Walkover, Mezzanine & Stair Tread

CONFIGURABLE OPTIONS EXAMPLE:

Example shown: Tekno designed and installed storage buffer system with mezzanine tread plate and guiderail. Access safety ladders were also constructed using Modu-Tek components.
