Progress On The New Sales Trailer

We are full steam ahead on our brand new 48ø Top of the line Sales Trailer. This trailer will have all of the latest and greatest features, from having a 75ö Television Screen on the outside of the trailer where when we set up shows to an automated elevator to dispatch our AGV. You will be able to see the simulation screens for the AGVø. Just imagine if you could actually see what you could do in your facility before you received it we will have that capability.

Right now we are in the fabrication stage of the trailer.. Material is ordered and delivered. This is a very exciting time for all of us in making sure that we bring the top of the line product to your door step. So if you are interested in scheduling one of the first shows when we are fully ready please contact us at Sales@Tekno.com.

Automated Guide Vehicles Simulation

When you are planning how many Automated Guide Vehicles you need in your assembly line, there is always so many questions.

Questions as such:

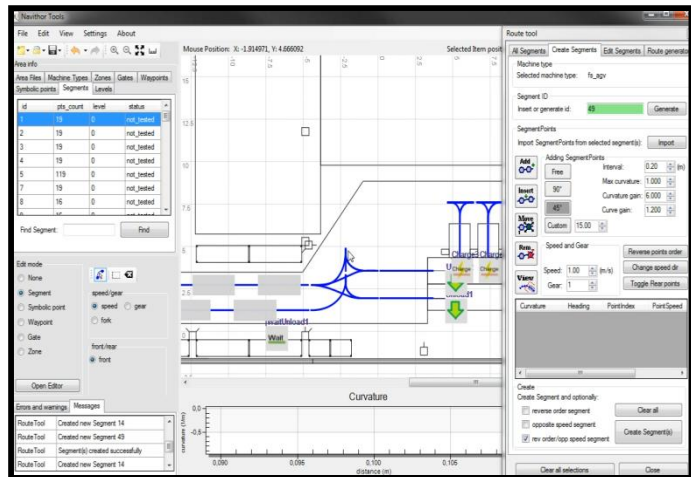

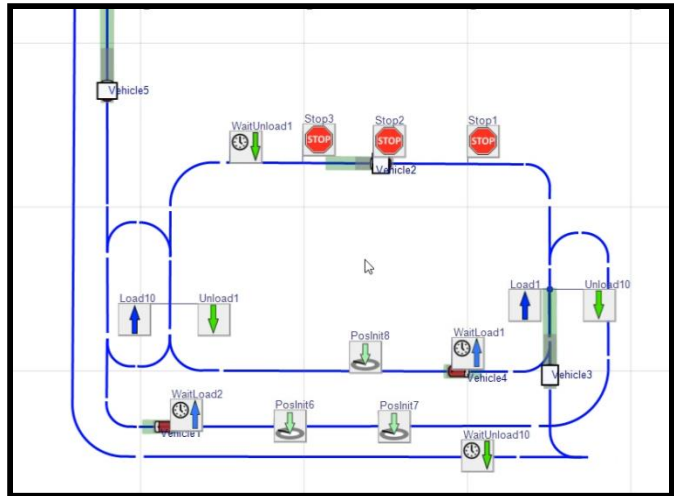

How will we make this flow?

How will it work in for our facility?

How many AGVs do we need?

How many Charging stations?

This can all be simulated now with our new system! We have the capabilities to simulate the whole AGV system. You can actually see your production line in movement before it gets to your facility. This is just another way that Tekno is moving forward with technology to help our customers further.

Just want to remind everyone to get their orders in for your components. Make sure you keep your shelves stocked with Tekno products. Our inside sales department is hard at work and will get your quotes and orders out to you. Contact Dustin Mustread at DustinMustread@Tekno.com or 270-773-4181 x 109.
