

Leading the Industry with Modular Solutions January 2016 Newsletter

Upcoming for 2016

As we close out another year at Tekno we would like to thank you for your business throughout the year 2015. As we move forward into the new year Tekno has several exciting adventures that we hope that you all will join us on. We will be launching several new products a few of them being the new Automated Guided Vehicles and the Gen 5 Pallet.

We will be officially established in Sattilo, Mexico where there will be Tekno Mexico.

We established in 2015 but will become a full blown IMEX Company in 1-2016.

We are excited to announce for 2016 we are creating a brand new 48ø fully automated sales trailer. The new sales trailer will be new and improved with latest updated and brand new products. Our team will be designing this trailer to travel around the country to show our products at your finger tips.

Conveyors, Pallets, Automated Guided Vehicles, Cranes, Elevators, Robots, Shuttles.

These are a few of the products that we provided.

New to the Tekno Team

Tekno is excited to announce two new members of the team that will expand our company to new heights. Tekno will now be able to have the capability to quote and deliver the full package from Automation, Electrical, and Controls. We will be able to build UL Listed Panels. We are in the process of new designs to further enhance our electrical capabilities. Let me introduce the two new team members of our Controls Engineering Department.

Jon Hinton joins the Tekno team with over 20 years of experience in controls engineering. He has previously worked at Dever Electric, Inc and Control System Design and Automation doing work with Allen Bradley Logix 5000, Factory Talk View, MSSQL, Wonderware, Cmore, Autocad LT and other automation and programming software Experienced with OmniServer and Zebra barcode printers, Metler Telodo IND 560 scale terminals and Cognex barcode scanners and AB Drives. He also graduated from Western Kentucky University. Tekno is excited about have him on our team.

Bradley Brooks also joins the Tekno team with over 20 years of experience in controls engineering. He has previously worked at Daicel Safety Systems America where he has worked with Mitsubishi IQ Works--PLC Basics, Structured, & Navigator software. ABB, Fanuc, Yamaha, Motoman and Denso Robotics Denso Wincaps III Software, and basic Denso repair. AutoCAD Electrical 2013 System Engineering and Design Software, AutoCAD 2013 Mechanical Design Software, Alibre Mechanical Design Software. He also graduated from Western Kentucky University. He has a wonderful family with one daughter that he loves to be involved in watching her play softball. Tekno is excited about his addition to our team as well.

There are many exciting adventures our company will be on these are just a few. If you have any questions or inquires that you would like us to look at don't hesitate to call or email us at any time.
