

TEKNO COVID-19 DIVIDER SHIELDS

As the nation begins to reopen, federal and state governments are encouraging and even requiring protective barriers be installed in businesses both large and small.

This is based on disease control recommendations and regulations and is meant to prevent the spread of COVID-19 by blocking droplets produced by coughs and sneezed.

We have designed and released these COVID-19 Divider Shields to provide a solution to this increasing demand for protection.

At Tekno, we know the safety of your employees and your customers is critical and we hope these COVID-19 Divider Shields allow you to provide the protection and security you need to step back into business “as usual”.

DESIGN OPTIONS

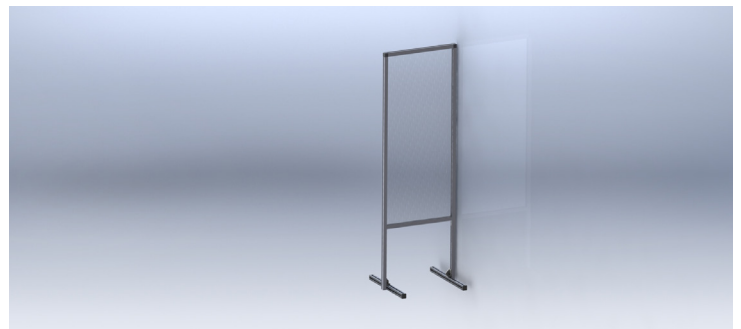

Desktop Units

Our desktop units are comprised of aluminum and polycarbonate to provide a sturdy, strong, clear, and effective structure and shield for your employees and/or customers.

The window on this unit is 48" x 26" with an overall height of 36"*. They provide a perfect physical barrier for the prevention of cross-contamination. These units are best suited for a desk, countertop or retail applications.

Price: \$215/Unit

Workstation Units

These aluminum and polycarbonate workstation dividers provide a larger, more expansive protective barrier for your employees and/or customers. Keep your workstations germ-free and operational with these sturdy dividers.

The window on these units are 26" x 72" with an overall height of 80"*. This provides the ultimate physical barrier for the prevention of disease spread. These units are best suited for dividing areas where operators are working side-by-side or where your employees are standing to do their work.

Price: \$360/Unit
